The icons below identify the type of technology associated with the LEDs of the product you are looking at.

The first step is the Static LED, acknowledged by the market for its brilliance and brightness.

Flashing LED products always contain white flashing LEDs, on each LED PRO product you can find indicated the exact number of flashing LEDs. The Twincolor Flashing LED products have 2 colors. You can choose which color to light the product with; besides this peculiar feature, this product is also equipped with white Flashing LEDs. RGB LEDs are, as the name suggests, Red-Green-Blue LEDs. These RGB LEDs always come with a controller which allows you to control the light effects. Motion LED products, are products that, thanks to a built-in controller, recreate light effects based on predetermined programs. Finally, Color-X LEDs are an innovative product set of addressable RGB LEDs.

We believe and promote

A story that started a long time ago... has now become a shared goal in the 2030 Agenda of the Kyoto Protocol.

The number of injustices, social interference, environmental disasters, and financial scandals that marked the 20th century led society and industry to face the future knowing that it needed a more ethical, sustainable, and just approach to business and development.

A series of catastrophic events in the 1980s, such as the Chernobyl nuclear reactor explosion, the chemical disaster in Bhopal, and the Exxon Valdez oil tanker accident in Alaska, were the last 'straw' to put the E of Environment in the center of public opinion and lead in 1997 to the Kyoto Protocol, an international environmental treaty on global warming, which came into force in 2005, initially ratified by 191 countries.

The ESG approach was born in the 2000s to broaden the topic of socially responsible investment. In 2006, the United Nations launched the PRI, Principles for Responsible Investment, to promote the diffusion of sustainable and responsible investment among institutional investors, who are asked to subscribe to and comply by their application.

Since then, more than 1,200 investors, asset management companies and service providers are signatories. They have pledged to incorporate ESG issues in their investment analysis and processes, in their own corporate policies and practices, to seek transparency on these factors in their counterparts, to promote social responsibility in the industry, to cooperate on this front and to document activities and progress.

ESG has had a long history, which in 2015 took a new step with the definition of the SDGs, Sustainable Development Goals: from adherence to the 6 principles to the approval of the 2030 Agenda for Sustainable Development, the core of which is the pursuit of 17 goals that aim to design a better future for all.

Environmental Responsibility

Environmental, Social, Economic Responsibility

Idolight® is committed to promoting sustainable development at all levels, through economic growth, social inclusion, and environmental protection. Idolight recognizes and agrees with the 17 Sustainable Development Goals. Known as SDG, these goals were defined by the Kyoto 2030 Agenda, to safeguard the planet and the welfare of its inhabitants.

What Value

Working on a daily basis to carry on manufacturing skills, industrial productivity and the quality of Made in Italy.

Close Cooperation

As soon as **Idolight®** is called to action, you will receive rapid responses with efficient solutions, thanks to the close cooperation between **Idolight®** partners and an integrated network of worldwide branches, that keep the company always close to the customer.

Environmental Responsibility

Idolight® is committed at any corporate level to environmental protection, helping to solve global sustainability challenges for the protection of our environment today as well as in the future.

Social Responsibility

Idolight® believes in a sustainable, transparent, and motivating development, capable of including all different stakeholders in its corporate growth path. The company also constantly encourages and supports its employees, whom it recognizes as a vital part of its business.

Business Policies

Idolight® is deeply committed in assisting existing and emerging companies in their efforts to grow and develop, with the purpose of creating a team-and-networking system capable of strengthening everybody's competitiveness.

Corporate Compliance

Idolight® operates in the most responsible way, in full respect of the laws and regulations of all countries it operates in.

The company does not tolerate immoral or illegal behaviors and has created its own corporate guideline, expecting all its managers and employees to behave ethically and in full compliance with the law.

Code of Conduct for Suppliers

Idolight® works on a global scale with a diverse multitude of partners, to whom it firmly requires to operate in compliance with the fundamental values on human rights and environmental sustainability. Idolight® will not tolerate any violation of these basic values

Diversity

Diversity and inclusion are fundamental values for **Idolight®**. Diversity in gender, origins, and age amongst Idolight's managers and employees are the first and most remarkable traits of this approach.

Idolight® is committed, on a global scale, to the creation of a workplace focused on inclusion, dignity, and respect of any individual involved. The company promotes a fair and accessible career opportunity. The range of opinions, perspectives, approaches, and talent are the cornerstones of a strong, flexible, and competitive company.

Always by your side!

wherever you are!

At your disposal A complete, digital and high-performance communication system built around you

Printed media

Catalogue

It is the main support that allows you to have a complete overview of Idolight® production, customized and turnkey services combined with pre- and post-sales assistance. The catalogue displays the products and projects organized by Collections; this type of presentation allows you to quickly identify and select themes and create moodboards for any project need.

Tabloid

It is the most immediate and punctual tool for discovering the wide range of Idolight products; It collects and offers products by type and by use. It facilitates the comparison and choice between similar products in terms of shape and use; allows you to select main products and complementary decorations with awareness and speed.

Online News & Newsletters

Always up-to-date: discover the online news published weekly on the website and subscribe to the newsletter to receive all the latest updates.

Social Networks

Idolight® promotes its products and services through a strong digital editorial planning involving the most well-known Social Networks: Facebook, Instagram, Twitter, Linkedin, Pinterest, Youtube.

Idolight® organizes each year events and appointments dedicated to developing customized projects and products, alongside its

Log in to the Idolight® e-commerce: the system automatically recognizes and attributes your business profile and gives you access to promotional activities for online purchases. A complete system that allows you to make purchases at any time from PC, Tablet and Smartphone. Take advantage of the promotions dedicated to online purchases only, stay updated through social media, the online news on our website and subscribe to our newsletter

Use the new e-Tabloid advanced search app: access the service from the Idolight® website, set up your 'favourites' search and download a PDE file of the created list complete with data, prices. and availability. This application allows you to carry out multiple and timely searches, defining lists of all the main products for your project. The system offers an overview of all new, presale, showroom, and pre-owned products

Work Together

It is an operational tool designed for the exchange of images, files, and information to develop the desired graphic project together. Useful during work-in-progress, it allows a direct management of communications and cataloguing in project folders to optimize the exchange of information with our designers and technicians.

Documents

Consult and download all documents within the reserved area: orders, invoices, delivery notes and quotations always available in a few clicks.

Custom Support

Product Technical Training

Idolight® organizes technical training courses for its partners on the correct use of the products, these are 'one-to-one' meetings both in presence, at the company, and through videocall.

e-Switch

IOT (Internet of things) is a unique system for the remote management of all your installations, from the simplest to the most complex.

Through the Idolight® e-Switch control units, it is possible to remotely monitor, program and manage the switch-on of your projects on PC, Tablet and Smartphone. From the office, from home or on holiday, remotely control the operation of your installations, whether it be single products or complete lighting projects. Access the e-Switch. Idolight.it Cloud service via Smartphone, Tablet or PC. Create your own switch-on points Manage projects in real time or schedule switch-on in a pre-set online calendar. Allow other Users and Customers to manage one or more installations.

Grow together

Complete services that can turn into opportunities to raise the level of quality and results together

Turnkey Solutions

Complete project governance: design, installation, switch-on, dismantling, maintenance, logistics

For customers who request it, Idolight® offers customized projects:

- · Definition of the Project and Presentation in photorealistic rendering
- Production of all the elements the project
- · Logistics management
- Installation management
- · Assistance for the first switch on
- · Management of disassembly
- · Return to the Idolight warehouses
- Restoration of any damage
- · Storage of materials awaiting the subsequent assembly, or return to the Customer's warehouses.

The proven network of Partner Installers with whom Idolight® has been collaborating successfully for more than 10 years all over the world, represents the greatest of resources. Thanks to our Premium Partners Idolight® is able to provide an impeccable 'Turnkey' service, ensuring that operational activities will always be carried out by local professionals, with all the resulting logistical and bureaucratic advantages.

Design

New processes, new materials, new possibilities...

3D Printing, CNC Milling, Plasma Cutting add up to an Industrial Carpentry, a 'Handmade' Finishing department and the infinite choice of increasingly performing and innovative materials. The production capacity of Idolight® grows with the growth that technology and the market offer every day. The introduction of new technologies and production techniques such as 3D printing. CNC milling and the use of new innovative and recyclable finishes or the reuse and regeneration of end-of-life products, has put the Idoliaht Design Team in front of new and interesting challenges and possibilities. The combination of all these elements is translated into new Products and new Collections confirming an undisputed vocation for Absolute Quality in the results and in the contents.

Upcycled Products Program

Refurbish your LED Decorations, renewing them in technology and aesthetics.

Change the color of the structure, renew the lighting system with new technological solutions (RGB DMX, RGB, Flashing LED, and many others), replace the garlands and the inserts to get a completely new decoration in style and performance, while taking care of the environment. The ideal service for companies carrying out the rental service, giving them the possibility of having a warehouse of always innovative products, of excellent quality and

Recycled & Upcycled

Innovative materials and reusable materials, for a richer offer of opportunities and contents Idolight® supports its customers in their choices, offering products made of recyclable and reusable materials,

All Idolight® products are recyclable, i.e. they can be disassembled and the individual components can be taken to the right collection centers to be 100%

Recycled materials. These are materials derived from recycling and ready to start a new production cycle (e.g. aluminum recycled from scrap, plastics deriving from regenerated packaging). Idolight® is sensitive to this type of choice and always favors it whenever possible. To date, every Idolight® product is made up of 50% recycled materials.

Upcycled products. These products are made wholly or in part from materials derived from production waste or disposed materials, and at the end of their life. These Led Decorations are unique pieces, commissioned or proposed in the Upcycled Art Area.

Upcycled Projects

Unique solutions to stand out and create value in an ethical and eco-friendly way. Upcycled by Idolight® is an exclusive collection of festive decorations, designed with materials and objects at the end of their life and destined to become waste

The Upcycled by Idolight®'s collection includes several unique, colorful, original and of great aesthetic impact decorations oriented towards sustainability and reduction of environmental impact. Upcycled decorations by Idolight® are designed and made with finishes and details characteristic of the brand. Each decoration is unique and entirely hand-finished.

Redesigned according to Idolight®'s typical standards, the life of objects and materials used in the past is prolonged and renewed, thus enhancing, and embellishing the magical moments of those who will appreciate them in the future.

How Do We Work

Idolight®'s catalogue is composed of a wide range of LED products and 3D decorations of any size: innovative and technologically advanced products realized with top quality material and finishes, specifically conceived for the satisfaction of a vast variety of tastes and needs, planned for the most diverse fields of interest. The expertise developed over the years allows the company to optimally care for any kind of customer, guaranteeing a high level of trustworthiness.

Idolight® globally distinguish itself for its operational approach and its ability of building deep and trust-based relations with its customers.

The company's team of graphic designers and technicians is the best partner for achieving valuable results, thanks to its professionalism and ability to turn interesting yet hard challenges into original, valuable, and creative opportunities.

An easy and neat path leading to turn-key solutions

Using Idolight®' services is the best way to fully exploit the potential our business system can offer. This system is built on competence, rapidity, and efficiency in the operational stages, and allows to define guaranteed results from start to finish.

- 1 Identification of the main purposes of the Project
 - Listening, identification of the real needs, definition of the budget.
- 2 Project Design

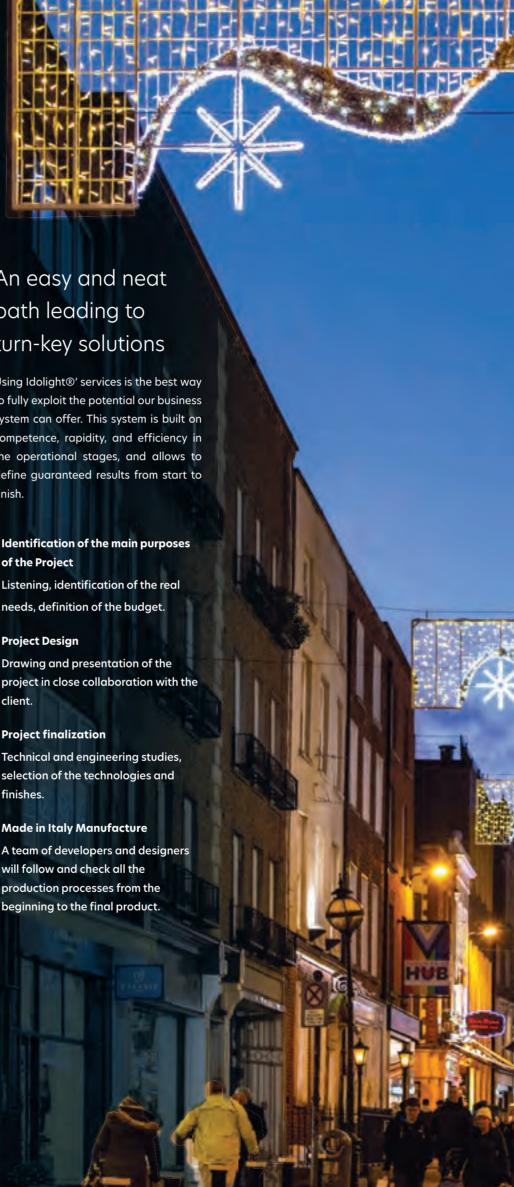

Drawing and presentation of the project in close collaboration with the client.

3 Project finalization

selection of the technologies and finishes.

4 Made in Italy Manufacture

will follow and check all the production processes from the beginning to the final product.

Hospitality & Accomodations

Make your location a magical place. Treat your customers with breathtaking views, set up facades, gardens, and parks. Create Selfie Points and add memories to your customers

Be the best for an unforgettable Christmas!

Theme Park & Big Events

Magic atmospheres for unforgettable events

The ideal response for Interactive themed-areas

Idolight® brings light decoration to the highest level with in-and-outdoor oriented tailored solutions for events and happenings.

Product launches, grand openings, and galas: for each event we offer customised solutions with great visual impact.

Bring life to your Theme Park with our interactive proposals! Personalized Selfie Points to increase your social media engagement and guarantee a great success at every level.

Shaping Ideas

Making way for ideas through brand new solutions requires a constant research effort.

vour

It is important at **Idolight®** to observe and understand the ever-changing needs of the market, new trends and the latest technologies.

All this allows **Idolight**® to take each product, innovation, and uniqueness into consideration.

The **Idolight**® Design Team works with daily passion and with no fears of confrontation with the market and customers' specific needs, with the aim of creating products and solutions fully aligned with expectations.

The origin of **Idolight®**'s products follows a well-defined path: every single idea comes to life in the shape of graphic drafts and digital renders, whose feasibility is verified by the production team. They are eventually translated into actual technical drawings, waiting for the manufacturing phase to start.

When all the details of the products have been defined, it is time to turn decoration into production. The technical information is delivered to the **Idolight**[®]'s production facility, where the frames are assembled from aluminum, a light and strong material.

Frames are then powder-coated to guarantee a high level of performance and aesthetic quality that lasts throughout the product's life; the frame is taken to the next stage where the lab can proceed with lights installation, surface materials and accessories, following the instructions of the Design office.

The opening of the new and enlarged production base in Italy allows the production department to be even more responsive, to support every customer's need and to manage a time pressured-schedule while ensuring and maintaining a high level of quality and reliability of the entire chain.

The company's direct supervision on the manufacture guarantees the customer the supply of a tested, certified, and refined product in line with the quality standards of Made in Italy.

Fine Art Solutions

Quality, tradition, innovation, safety and modularity: key words for successful products

The Idolight® Design Office is a real resource, able to assist the client from the planning stage to the final result: a team of artists, designers and technicians working together to create unique, finely finished, and accurately designed products. Design, Software and Strategy for innovative creations to serve our customers.

Not only design

Idolight[©]'s products uniqueness is not only limited to the quality of design: beside it, a wide offer of both classic or RGB LED chains – manufactured with the latest technologies.

This range of products is composed of three voltage families: 230V, 120V, 12-24-36V.

For all equal voltage items, Idolight® has created a quick connection system called Easy Joint, based on high quality, safe and efficient connectors. The use of certified LEDs guarantees bright and vivid colors for the product's entire life span.

360° light diffusion in granted by a specifically designed polycarbonate capsule with a hollow point, which allows a perfect diffusion of the LED's luminous flux. A strict and efficient control system during the whole production cycle grants those who choose Idolight® multiple guarantees and a considerable competitive advantage.

All products systematically undergo a constant testing program carried out by renowned European institutes of certifications. IMQ-GS certifications attest that Idolight® products comply with the standards of the respective regulations in terms of safety and reliability.

EASY TO TO THE SYSTEM

24V | 120V | 230V

The **connection** system in **Idolight®** products that makes **everything safer**

Easy Joint is the connection system specifically conceived for Idolight® products that allows to link, extend, and split power supplies, chains, and decorations in a safe and easy way, with no tools needed.

This system allows each **Idolight®** product to be easily connected to any other same voltage item equipped with

quick attach connector. The system comes in three versions: **230V** (IP67), **120V and 24/36V** (both IP44).

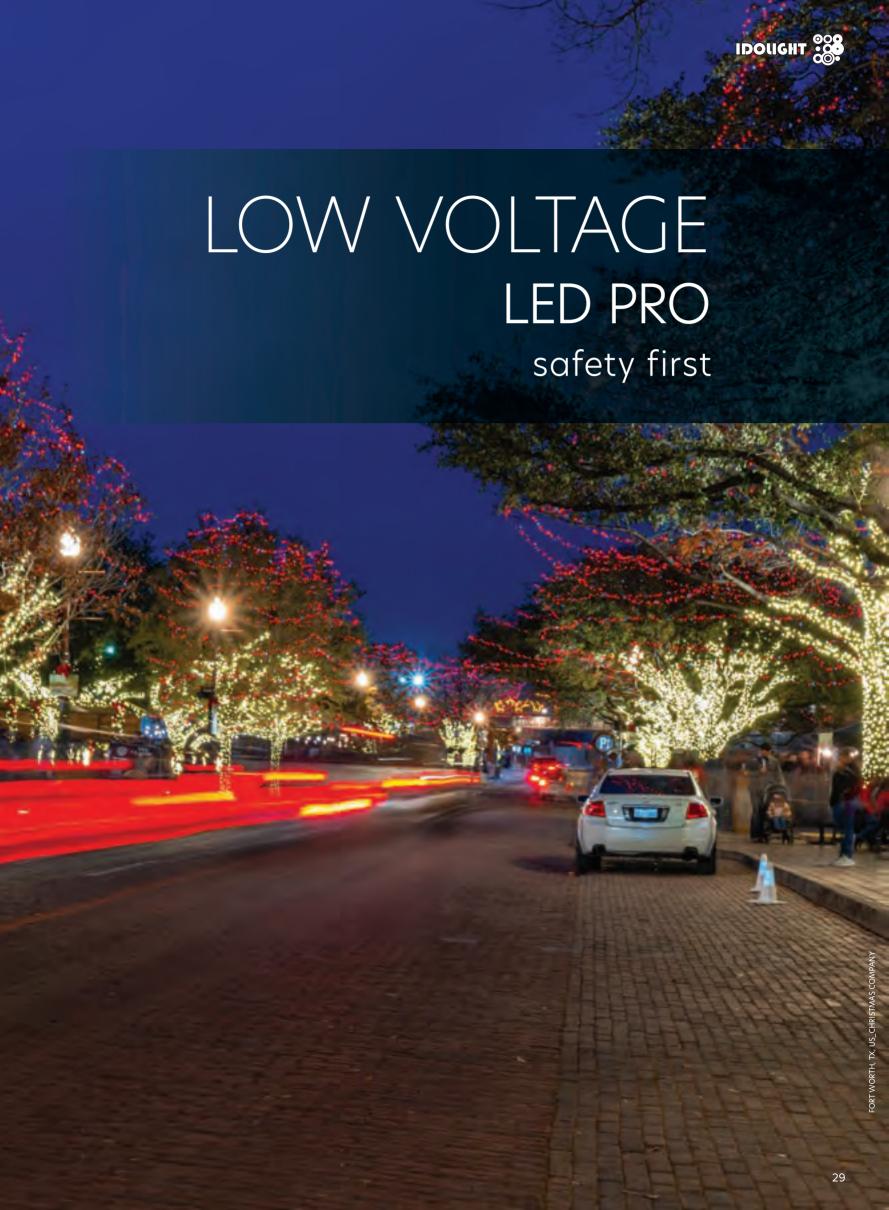

The wide range of "T" accessories and extensions allows the optimization of access points and current distribution, increasing the creative capabilities of staging and decorations.

Three good reasons to choose Easy Joint

- Reduced installation time and maximum ease during set-up phases, allowing a decrease of risks and costs.
- Maximum safety is achieved thanks to IP67 screw connectors which grant absolute protection against water infiltrations.
- Finest aesthetics of the projects and the completeness of the Easy Joint range allow to achieve neat and elegant wirings.

WARM WHITE LED TRANSPARENT CABLE

PACK 10 pcs / 12,2 kg / 53 x 34 x 25 cm

Suitable for covering uneven surfaces such as plants and bushes, they are powered at low voltage and are safe on accessible surfaces and areas.

The neat structure of the net is achieved by the interlocking of wires on the bulb with the new 'Clip Bulb' system integrated to the LED lamps.

LOW VOLTAGE ACCESSORIES

All you need to create your projects in a fast, neat, and completely safe way

LED PRO LOW VOLTAGE ACCESSORIES (24V/36V) are IP44 rated, which, in relation to the low voltage, is a guarantee of maximum safety both indoors and outdoors.

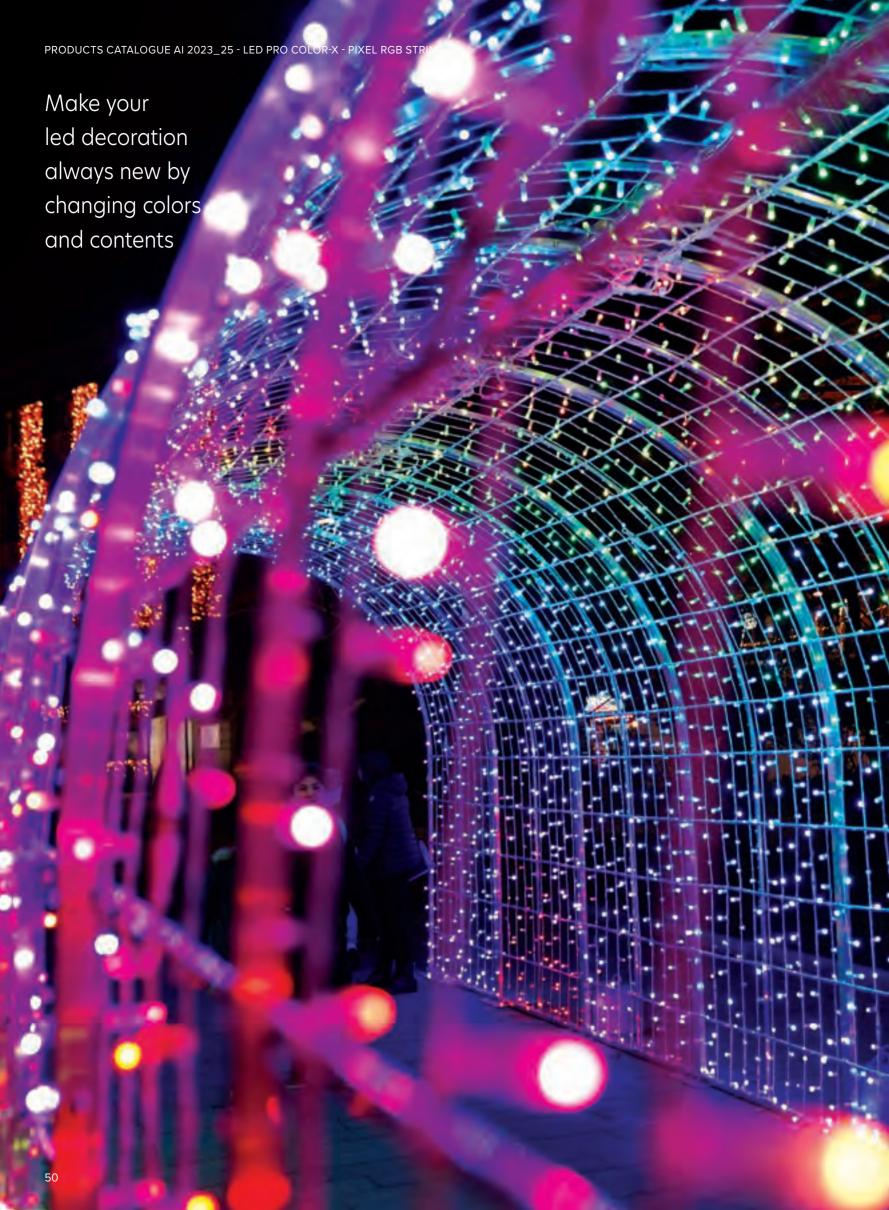

COLOR-X LED PRO

innovation first

COLOR-X

CONTROLLABLE

Light and color with items from the COLOR-X series.

Products with high quality **RGB LEDs** controllable and addressable, they are designed to provide outstanding brightness and color quality with over 16 million colors. Perfect for use in both indoor and outdoor environments, whether for Christmas decorations, parties, summer festivals, exclusive locations.

Color-X. is an innovative range of Pixel controlled RGB LED products.

This technology allows the programming and management of lighting effects.

Products of different formats and for different types of use are part of this series.

Strings, rigid bars, baubles, and strips all with a single Easy Joint connection system, allowing projects to be managed under the direction of a single controller, with the ability to create multiple lighting effects using different shapes.

Color-X includes a wide range of dedicated **Easy Joint** accessories that allow easy, fast, and safe connection.

This series products are addressable and controllable according to common protocols that can also be managed independently with **opensource programming software.**

PIXEL RGB STRING

COLOR-X

PIXEL RGB strings represent the evolution of the traditional LED strings. They can be installed in the shape of a "curtain" or in a linear format and allow the creation of active and time-varying animations and video-messaging. Having the same format as traditional LED strings, they also allow the realization of lighting decorations. The modules are made up of pixels which are controllable via SD memory card or LIVE, directly from your PC.

e-SWITCH

Full control of Your installations from Your smartphone, PC, and tablet through the Cloud service and the Web-App

Each e-SWITCH device is connected to the data network either via a Sim card or through a Wi-Fi connection, making it independent and always reachable from smartphones, PCs, and tablets.

Each User can independently set up the system, manage directly from its own control panel multiple installations, and divide each installation in multiple items to be managed and monitored individually.

Multiple Installations Management or Single-Installation Management equipped of multiple e-SWITCH devices that could be managed independently or combined.

- Install an e-SWITCH device for every power source in your installations. Each power source will require an e-SWITCH device
- 2. Create Your account in Idolight® Cloud Service
- 3. Connect all e-SWITCH devices through Web-App
- Easily program the daily Switch on/off calendar on each device other than Special Events with personalized settings.
- **5. Monitor** the proper functioning of the system and trend of consumptions* directly from smartphone, PC, and tablet
- 6. Extract, save and print the reports for analyze consumption data.

*Function available with the Energy Meter Add-on only.

e-Switch.

Full control of Your installations from Your smartphone, PC, and tablet through the cloud service and the Web-App.

e-Switch 2G - Item no. 130-231

Connects to the cloud through internal sim card (not included).

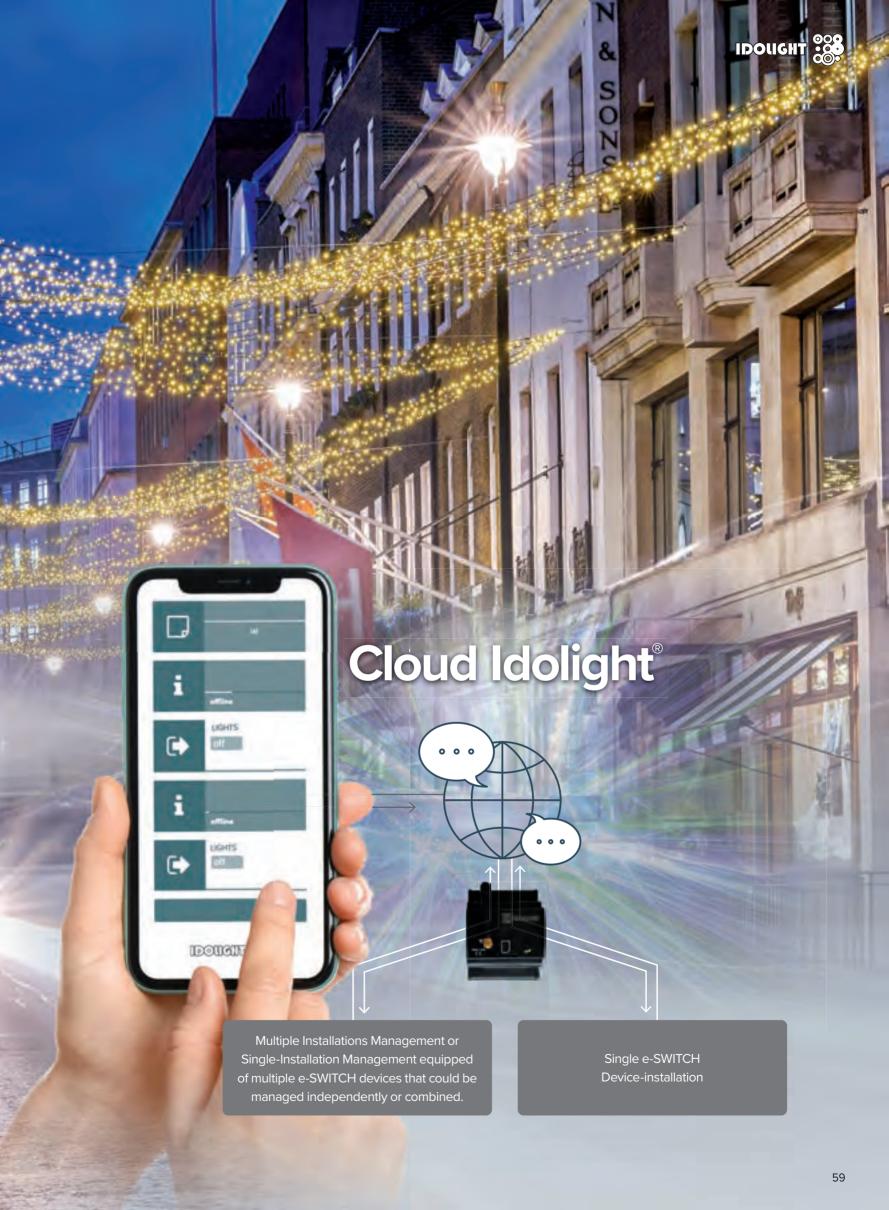

e-Switch Wi-Fi - Item no. 130-230

Connects to the cloud via Wi-Fi network.

Scan the QR Code and add the WebApp Idolight® to your smartphone. Access all Idolight® content and services with a simple click... Let's stay in touch!
